

HARSH NILESH BUBNA

Software Engineering & AI/ML Aspirant | B.Tech CSE (AI & ML), SRM Institute of Science and Technology
Malad East, Mumbai, Maharashtra, India | +91 77384 35789 | harsh.bubna06@gmail.com
[linkedin.com/in/harsh-bubna](https://www.linkedin.com/in/harsh-bubna) | github.com/Harsh-2706

EDUCATION

SRM Institute of Science and Technology, Kattankulathur <i>B.Tech, Computer Science and Engineering – Artificial Intelligence and Machine Learning</i> CGPA (through 4th semester): 8.99	2024 – 2028
Prakash Junior College of Commerce and Science, Mumbai <i>Class XII, Maharashtra State Board (MPC)</i> Percentage: 65.17%	2024
Witty International School, Mumbai <i>Class X, IGCSE</i> Percentage: 87.83%	2022

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Libraries: ASP.NET Core, React, Next.js, FastAPI, Node.js/Express, SQLAlchemy, Tailwind CSS, scikit-learn, Pandas, NumPy
Concepts: Machine Learning, AST Parsing, LLM/Context Optimization, REST API Design, Software Testing & QA, Full-Stack Web Development, Geospatial/GIS Integration, SEO Optimization
Tools & Platforms: Git/GitHub, MySQL, Supabase (PostgreSQL), Vercel, Render, VS Code, Visual Studio 2022, Figma, Google Analytics

EXPERIENCE

Zire — Growth & Outreach, Summer Intern <i>Zire is an AI-powered recruitment platform helping enterprises automate and streamline talent acquisition.</i>	May 2026 – Jul 2026
Product Testing & QA: Conducted structured product testing on Zire's AI-driven recruitment platform — identifying functional issues, logging bugs, and validating feature releases prior to client-facing demos. - Delivered end-to-end product pitches and live demos of Zire's AI recruitment capabilities to enterprise clients and MNCs. - Drove outreach strategy and sales pitching for webinars targeting HR and Talent Acquisition professionals across pan-India metros. - Built pitch decks and sales collateral that strengthened enterprise client engagement and product awareness. - Owned end-to-end webinar execution — content structuring, audience targeting, and post-event follow-up.	
DP Chocolates — Project & Web Development Intern (Hybrid) <i>DP Chocolates (2M Cocoa) is a leading Indian cocoa and chocolate processor supplying ingredients to Cadbury, Unilever, Britannia, and Lotte.</i>	Jun 2025 – Sep 2025
- Built and deployed a responsive ASP.NET Core business website with product catalog, supply-chain transparency modules, and B2B logistics documentation. - Implemented CRM support features and SEO optimization that strengthened the company's digital presence and customer engagement. - Partnered with stakeholders to translate cocoa supply-chain operational requirements into scalable web solutions.	

PROJECTS

Legacy Code Modernization Engine — Intel Unnati Programme Challenge <i>Python, FastAPI, SQLAlchemy, GitPython, Next.js, React, Supabase (PostgreSQL), GPT-4o, Gemini, Groq</i>	Feb 2026
- Built a production-grade tool that migrates legacy Java/Python repositories to modern Python using a custom context-optimization pipeline, cutting LLM token usage by 60–92% and hallucination rates by ~40%. - Designed an AST- and regex-based pruning engine with transitive dependency mapping to strip UI/boilerplate noise while preserving business logic before sending code to the LLM. - Shipped a full-stack app (FastAPI backend, Next.js/React frontend, Supabase persistence) deployed live on Vercel and Render, with a schema-validation layer to catch malformed LLM output.	

GeoPulse Fiber AI — Tanfinet 48-Hour Hackathon (Top 15 Teams)

Feb 2026

Next.js 14, TypeScript, React-Leaflet, FastAPI, scikit-learn, Pandas, NumPy

- Built a predictive-maintenance platform for fiber-optic infrastructure using a Random Forest classifier (~10ms inference) to score failure risk from live weather, terrain, and seismic data.
- Integrated real-time GIS mapping with NASA EONET, USGS Earthquake, and Open-Meteo APIs, plus a smart-dispatch engine that auto-assigns the nearest qualified technician to predicted faults.

DP Chocolates Website

Jun 2025 – Sep 2025

ASP.NET Core, HTML, CSS, JavaScript, C#, Google Analytics

- Developed and deployed a live, production business website for an industry client (2M Cocoa/DP Chocolates, B2B supplier to Cadbury, Unilever, and Britannia) featuring a product catalog, supply-chain transparency modules, and CRM workflows.
- Implemented SEO optimization and analytics tracking that strengthened the client's digital presence and customer engagement.

AMS Pro — Intelligent Inventory System

College Coursework Project

Node.js, Express.js, MySQL, ZXing, QuaggaJS, Tesseract.js

- Built an AI-powered inventory system with a triple-engine barcode scanner (ZXing, QuaggaJS, Tesseract OCR) that reads damaged or curved barcodes directly from photos.
- Automated product identification via public API lookups (OpenFoodFacts, UPCItemDB) with a web-scraping fallback, removing manual data entry from warehouse workflows.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle (Nov 2025)
- Oracle Data Platform 2025 Certified Foundations Associate — Oracle (Nov 2025)
- Oracle Fusion AI Agent Studio Certified Foundations Associate, Rel 1 — Oracle (Feb 2026)
- Responsive Web Design — freeCodeCamp (Jan 2026)
- Programming in Java — NPTEL (Nov 2025)
- Fundamentals of Object-Oriented Programming — NPTEL (May 2025)
- Data Science & Analytics — HP LIFE (Feb 2026)
- AI for Business Professionals — HP LIFE (Feb 2026)
- AI for Beginners — HP LIFE (Feb 2026)

COMPETITIONS & ACHIEVEMENTS

- **Tanfinet 48-Hour Hackathon — Finalist (Top 15 Teams)**, Tamil Nadu Fiber Net Organization, Feb 2026 — built GeoPulse Fiber AI, a predictive-maintenance solution designed to safeguard fiber-optic telecommunications infrastructure, moving network operations to a proactive model using Machine Learning and real-time environmental intelligence.
- **Techknow Project Expo — 1st Place**, SRMIST Physics and Nanotechnology Department, Dec 2024 — sensor-based automated irrigation solution optimizing water usage via soil-moisture monitoring.
- **Webstart Coding Competition — Top 10**, IIT Madras, Feb 2025.

CONFERENCES & WORKSHOPS

- National Conference on AI & ML for Smart Waste Management — Sairam Engineering College, with Save Tirupur Movement and ORCCI ECO Products (Sep 2024).
